
How to show an image as a link on my link?

Posted by Anba - 2010/12/21 19:48

Hi there,

Right now, this is the link i am using to load a module in to a lightbox..

```
{ariprettyphoto activeType="module" width="450" height="368" id="141" link="Show Joomla! module" title="Joomla! module"} {/ariprettyphoto}
```

And when i view the page, it shows Show Joomla! module as the text link in my site to view the module in the lightbox.

I want to know if its possible to show up a image as the link to load the module in the lightbox. if possible show the the sample script here. :)

Thank you

Regards,
Anba

Hello,

Sure, it is possible. Use the following code please:

```
{ariprettyphoto activeType="module" width="450" height="368" id="141" title="Joomla! module"}{link}/{link}/{ariprettyphoto}
```

Regards,
ARI Soft

Hi there,

How do i set the size for the picture that links to the lightbox, its shows now as 60px X 60px of size?

Is it possible to show in bigger size?

Thanks
