## Thumbnails: fixed height and aligned to left

Posted by artdirector\_1 - 2011/03/02 15:18

---

Hi!

The title said it all. I would like all the thumbnails to have a fixed height (mantaining width proportions) and all of them to be aligned on the left, so that I could have a different number of thumbnails on different rows (like in attachment). Is that possible?

THanks!

Hello,

Yes, it is possible. Set "Layout type" parameter to "Advanced gallery" and enter the following code into "Advanced Gallery -> Template" field:

```
{repeater}
{headertemplate}

{/headertemplate}
{rowtemplate itemCount="999"}
  {celltemplate}
    {$data:fancyimage}
  {/celltemplate}
{/rowtemplate}
{footertemplate}

{/footertemplate}
{/repeater}
```

Regards,  
ARI Soft
