
Flickr thumbnail all with same height

Posted by artdirector_1 - 2011/03/06 13:38

Hello!

Thanks for replying my previous post "Thumbnails: fixed height and aligned to left".

But the code you provided:

```
{repeater}
{headertemplate}

{/headertemplate}
{rowtemplate itemCount="999"}
{celltemplate}
{$data:fancyimage}
{/celltemplate}
{/rowtemplate}
{footertemplate}

{/footertemplate}
{/repeater}
```

generated this result (view attachment)

which is not exactly what I had in mind.

Besides It doesn't set a fixed height for all the thumbnails.

Any help would be really appreciated!

Thanks

=====

Could you provide link to page where we can see the issue, it can be a conflict with site template or 3rd party extension styles?

hi! thanks for reply!

the page is at

http://www.ottotto.it/index.php?option=com_content&view=article&id=2&Itemid=6

what could it be the problem?

If can be fixed in the following way:

Hello,

1. Add specific CSS class to gallery container. For example use the next code:

```
{headertemplate}
```

```
{/headertemplate}
```

instead of:

```
{headertemplate}
```

```
{/headertemplate}
```

In "Template" parameter

2. Add the next CSS rule to site template CSS file:

```
.fixed_flickr_gallery IMG
{
  height: 166px;
}
```

Where "166px" is necessary fixed height of thumbnails.
