Video not playing in IE8. Posted by timhoward - 2011/05/09 16:58
The following is working as expected at ecampus.pdpdglobal.com in FF and Chrome but not IE8 when using AVreloaded inside ARIfancybox. In IE8 the video does not size correctly and will not play.
{arijfancybox width="400" height="320" title=""} {arijfbicontent}{/arijfbicontent} {arijfbocontent} {flvremote}http://pdpecampus.s3.amazonaws.com/brent_ecampus_intro.flv{/flvremote} {/arijfbocontent} {/arijfancybox}
Please advise.
Thank you!

Hello,
Could you provide link to page where we can see the problem?
Regards, ARI Soft

ecampus.pdpglobal.com
Thank you!

"ARI JFancyBox" can't be integrated with AllVideos extension in described way due to javascript conflicts. It can be integrated if create new articles for each video files and load video into an article with help AllVideo extension and then load article into fancybox.
