## Article in ARI Fancybox with ARI Cloud Carousel

Posted by Jonathan - 2011/05/30 00:21

---

I'm using ARI Fancybox with ARI Cloud Carousel. When clicking a thumbnail in ARI Cloud Carousel, I want an article to appear in an ARI Fancybox popup. How can I do this?

Hello,

Install "ARI Fancybox" module then install, enabled and configure "System - ARI Fancybox" plugin. Set "Lightbox integration" parameter to "ARI Fancybox" and set "Use thumbnails" parameter to "Yes" or define links for images in INI file.

Thank you.

I've done all of this, but this still doesn't explain how to get a Joomla article in the ARI Fancybox popup. I am able to use the ARI Cloud Carousel INI file to link to any URL, internal or external. This enables me to link to an entire internal Joomla page, but how do I link only to an internal Joomla article?

Thanks.

You can use the next link:

`index.php?option=com_content&view=article&tmpl=component&id=ARTICLE_ID`

Where ARTICLE\_ID is ID of necessary article. For example if you want to show article with ID equals to 73, use the next link:

`index.php?option=com_content&view=article&tmpl=component&id=73`

Excellent! That should do it.

---

Thanks again.
