Ari Pretty Photo won\'t display images

_____

Hi,

I've recently purchased the Ari Pretty photo module. I added the module and selected the images/zmode as per the instructions however my simple gallery does not display.

I'm running Joomla 1.5 and have checked my settings and they all appear to be correct.

Here's a link to the dev area so you can see the problem.

Any advice gratefully received.

Thank you

Zoe

Hello,

Could you provide screenshot of module settings page or temporary access to your J! backend by email that we can investigate the problem?

Regards,
ARI Soft

Hi,

Thank you for the super quick response.

I've attached settings and emailed you a temp login for the site.

If you require any further information please let me know.

Thank you again.
