## open new article in fancybox, w/out leaving window

Posted by mollied - 2011/07/29 17:15

---

I am using fancybox to open several forms on my site. I am using both Fancybox and Fancybox anywhere. In both instances, upon form submit, I would like to remain in the Fancybox window. To be specific, I would like to be able to move from the form into a follow up article (from whence a user would either download a piece of content, or would see a thank you/response page). After viewing that 2nd article, they could close out of the Fancybox window normally. Is there a way to do this? Hello,

Do you want to hide close button in the lightbox on first form and show it on the last page (thank you page)?

Regards,

No - when the user clicks the submit ("Contact Us") button, I want the article opened by the submit action to open within the fancybox window.

Could you provide link to page where we can see form with "Contact us" button?

Regards,
