\'Error! Could not find a Joomla! XML setup file..\'

Posted by artcop - 2011/11/01 19:01
_____

This is for the plg_system_ariextensions package. All the others installed alright. I've tried turning off/on FTP layer within the Global config., etc. Tried to unpack it and install it through the tmp folder.. still won't read the XML file.

_____

Hello,

"System - ARI Extensions" plugin is required only for Joomla! 1.6+. This fact is described in readme.txt file from extension's archive.

Regards,
ARI Soft
