
display none for arifancybox syntax

Posted by wilo - 2012/01/04 10:50

hi,
we use a editor.css for the TinyMCE editor in joomla. When edititing an artikel, the arifancybox plugin and parameters are bothering us; the syntax is bigger than the link-text.
can I set something like display:none for the arifancybox in the editor?
thanks
