## link inside article

Posted by dabo - 2010/01/24 12:28

---

Hi

I have installed ARI Fancybox and can't figure out how to put a simple link inside an article.

The demo seems to demonstrate a link to inline content and this is what I want to do.

Any help would be appreciated.

To clarify matters:

I wanted to insert links into an article and not in a module position. I have now found a solution using another plugin to help place the Fancybox module in an article.

Hello,

Your version of the plugin only supports adding 'ARI Fancybox' module into article, but we have updated 'Content - ARI Fancybox' plugin and now it provides ability for typing 'ARI Fancybox' parameters inline in article. You can download the latest version of the extension in 'Member Area' on our site. For showing inline content, use the following syntax:

```
{arifancybox activeType="icontent" icontent_link="Click me" icontent_title="Title"}Inline content which you want to show in fancybox goes here.{/arifancybox}
```

where can I find 'Content - ARI Fancybox' plugin? I am trying to link a flash file to the Fancybox module in an article to random images in a folder. Please help if you have a minute - this is a little over my head. Many thanks

Hello,

Use 'System - ARI Fancybox Anywhere' plugin instead of 'Content - ARI Fancybox' plugin because 'Content - ARI Fancybox' is outdated plugin and 'System - ARI Fancybox Anywhere' is enhanced version of this plugin.
