## Many Galleries: different No. of columns

Posted by dimps1 - 2013/01/18 13:45

---

Hi,  
I'm building a site with many galleries on many pages. Is it possible to specify different numbers of columns on different pages(e.g 3 or 5)in the page coding? Or can one only do that in the plugin. (I'm adding galleries to articles.)

If so, what code do I use?

Thanks in advance.

Hello,

Do you want to specify number of columns for "Simple gallery" layout in {arifancybox} plugin tag?

Regards,  
ARI Soft

Yup, but I managed to figure how to do so myself, thanks.  
For anyone else who didn't read the instructions properly:

Add: itemCount="4" (or however many columns you want) to your coding in the article. It overrides the set number in the plugin, in case you want to individualise a page or two.\

You need to be using the plugin Fancybox Anywhere.
