
ARI onload

Posted by joosocial - 2010/05/24 08:38

Hello

I want to use the ARI fancybox on my homepage with the onload function.

What I want is to save something in the cookies, so when a visitor visit the page for the SECOND time the box won't load again. So just one time per visit.

Is that possible?

Thank you

=====

Hello,

If you want to show fancybox only for the first time, set 'Open on load' parameter in module settings to 'Only once'.

Regards,

ARI Soft

hey..

i have the same prob...

where i must put in what?

i'll use the ARI JFancyBox and what (via cookies expired 7 days) if the user vist the "home" page see this box once.. and if he comes back or going back on the first site, that he doesnt see the box

...

i guess a js trigger could help with andy if elfe snippets to check if this the main page

can u help?

ps.: i mean ie the function autoOpen="true" from the jdialog but in the design of the fancybox with an cookie that the box only comes once a day or whatever x days

Hello,

Specify please do you mean ARI Fancybox or ARI JFancyBox plugin from ARI Smart Content extension. These are two different extension and 'ARI JFancybox' plugin doesn't provide possibility to auto open the lightbox.

Regards,

ARI Soft
