
Facybox Modal Window: No scrollbar - iPad/iPhone

Posted by dimps1 - 2013/11/14 09:00

Hi,

My modal windows show a vertical scrollbar, if necessary, on all my browsers and Android tablets/phone, but not iPad/iPhone. Is there a way to fix this?

Thanks and regards.

Hello,

Where we can see the problem?

Regards,
ARI Soft

<http://www.devtraining.co.za/beta/courses.html>

Each course title links to a modal window

thanks!

Safari browser doesn't support scroll in element. Possible solution to add the following CSS rule to a site template CSS file, clean browser's cache and use two-finger scroll for content into the lightbox on iPhone/iPad:

```
body #fancybox-content
{
  overflow: auto;
  -webkit-overflow-scrolling:touch;
}
```

Hello again,

Thanks very much - it worked. But I realise I still have a problem. If you zoom in, and then click on a link to a modal window, the window can appear outside the iPhone viewport (depending on how much you've zoomed in. Sort of bottom right).

Can one fix this?

Thank and regards.

Download and upgrade the module. After this clean browser's cache.

You guys are fantastic - it works! I use Fancybox on all my websites for a variety of applications, don't need anything else in terms of modal windows and photogalleries. If I have a problem you either point me in the right direction, or fix the app. Thank you!
