Fancybox direct link from Ari Data Table

Posted by johnny@ejs.dk - 2014/09/01 09:20

_____

I would like to link from Ari Data Table directly to Fancybox with one article inside, i also need to pass one parm value to the article.

Today I link like this: Mangler
Here I pass INC to the article and this works perfect.

I need the correct syntax to do the same, and let the link from Data Table open the same article inside Fancybox (including parm!)

Is that possible?

Sincerely Johnny Ejs

_____

Hello,

If you mean ARI Fancybox extension check that "System - ARI Fancybox" plugin is installed and enabled and use the following code in "Columns settings -> Format" parameter:

Mangler

_____

ThankYou for quick responce.
I have the module installed and enabled. A separate article with Fancybox reference works fine.

Your suggestion works so far, that it opens the desired article - BUT only in Joomla (same page) - no Fancybox.

If I copy the link is seems to me like something is stripped of?

"http://changeweb/index.php/2-uncategorised/32-hvad-mangler-sagen?INC=INC000001489218"

Hope to hear from You again.

_____

We have tested the provided solution on our test server and it works fine. BTW, we wrote about the plugin, not about the module.

Could you provide a link to a page where we can see the problem?

PS: Send your order number for "ARI Fancybox" extension by email please.

Regards,
ARI Soft

_____

I have mailed my order no.

My site is behind Firewall but i am trying to replicate the problem at a public site!

Did i mention, that I am using Smart Content plugin and Data Table module?

Now it works.

After Installing Ari Fancybox along with the Ari Smart Content Fancybox this works.

I have one request though!

The Fancybox includes my hole site rather than just the requested article - is there a way to change that?

Sincerely Johnny Ejs http://www.ari-soft.com/images/fbfiles/images/Udklip1.GIF

_____

Add tmpl=component parameter to the link.

Regards,
ARI Soft

_____

I have tried but not succeeded yet, this is my current link:

Mangler

Just where does it go?

Sincerely Johnny Ejs
