
How to call Fancybox from ARI Data Table

Posted by ferdigerungan - 2014/11/23 07:20

Dear Support,

In my ARI Data Table config... is used these format and everything goes well with it
{ \$value }

But now i would like to call fancybox so that the result of the article after clicked the column (with that statement) could be within the fancybox

Would u tell me what is the statement?

Thanks
