
Auto open on page load

Posted by stephanbeek - 2015/04/30 10:06

On your demo site for fancybox I read: "Can show popup automatically when page is loaded;"

This is not covered in the documentation (you should update the documentation, because this is not the only thing that's missing).

How to do this?

Hello,

If you mean "Fancybox" application from "ARI Smart Content" package (not "ARI Fancybox" extension), it doesn't support this ability.

Then I am afraid this is misleading. I did not buy the separate Fancybox extension, because you advertised at the bottom of this extension:

Note: You can be interested in ARI Smart Content extension. It contains a lot of applications including Fancybox application.

No mention, in any sort, that the Fancybox included in ARI Smart Content is different. So I did not invest \$15 in Fancybox, but \$35 in Ari Smart Content, and got a minor product. I did not (of course) read the documentation of both "Fancyboxes" to make sure they were the same. Why should I? The same product name from the same company. You should have stated:

Note: You can be interested in ARI Smart Content extension. It contains a lot of applications including a version of Fancybox application with limited functionality.

Then I would not be mislead.

Regards.

"Fancybox" application "ARI Smart Content" contains more features (at least it can be integrated with other applications from "ARI Smart Content") than "ARI Fancybox" extension. Some minor features can be skipped in "Fancybox", but you can submit a feature request here and we will implement them in a future version of the extension.

Thanks for your answer. I will do a request. And I still would advise to make it clear that you sell different Fancyboxes.

The feature is implemented in v. 2.2.21. [Read more here.](#)
