Articles are displayed with no margin
Posted by susanp - 2015/09/27 04:45
_____

Hi, Support,

I am using ARI Fancybox Anywhere to display Joomla Articles in Fancyboxes using the directive:

{arifancybox activeType="article" opt_width="950" opt_height="600" id="21" link="Ray Meeker's Fired Houses by Jim Danisch" title="Click the title to view the article"}{/arifancybox}

As you can view on the attached screenshot, I have two issues with the article in the popup box:

1) The title of the main articles, in this case being "Fired House" appears on top of the popup box.

2) There are no margins round the popup article! The margins are correctly setup in the plugin configuration however!

Could you advise me please?

Hello,

About padding, try the following code:

{arifancybox opt_padding="20" activeType="article" opt_width="950" opt_height="600" id="21" link="Ray Meeker's Fired Houses by Jim Danisch" title="Click the title to view the article"}{/arifancybox}

About article title, check "Show title" parameter in article settings in "Options" tab.

Regards,
ARI Soft

Hi,

No, I meant that there are no margins round the article that appears in the popup box. I am displaying articles in popup boxes as you can see from the screenshot I have attached to my posting above.

Also the title that appears is the title of the main articles, in this case called: "Fired House". It is not the title of the article that I am displaying in the popup box.

_____

"opt_padding" parameter adds padding between article content and lightbox borders.

The extension doesn't add any additional titles to displayed articles. It is shown based on article settings. The extension uses standard Joomla! com_content component to display article. It just loads it into .

Yes, I can see Padding which is set to 10 and Margin set to 40 as the Plugin parameters but as the text is sticking at the scroll-er on the right, it indicates that it is not working. Could I send you a private message with the links to my development site and its admin please?
