## Title in fancybox not shown

Hi there

I have a site with installed module ARI Cloud Carousel Pro and Fancybox plugin.

In both the parameter 'Show Title' is set to yes, and the image-directory has a description file in it.

The titles are shown in the module as they should, but in the fancybox not. In the HTML of the fancybox I have just a empty title-elemnt with 'display:none' style:

What did I miss?

Galery is here:

Thanks in advance, regards

Roger
