
HOW TO MODIFY NUMBER OF COLUMNS IN MOBILE?

Posted by mrpartygipuzkoa - 2018/12/18 14:00

Hello, how can I modify the number of columns in each device? In the computer I have 4 but in mobile I get 1 and I do not know how to modify it.

On the other hand, how can I change the separation between one column and another? Thank you.

Hello,

Sorry, but it is not clear what columns you mean. Could you describe it in more details? It would be fine if you provide a screenshot.

Regards,
ARI Soft
