
Fancy PopUp is overlayed by menu

Posted by xeomueller - 2010/08/20 14:11

Hi,

I have a problem with the popup. The menu is over the popup. So i need do edit (or add) the z-index for the popup. Is it possible? Where can i change?

Hello,

Could you provide link to page where we can see this issue?

Regards,
ARI Soft

Visite:

<http://augenlinik:wolfsburg@www.augenlinik-wolfsburg.de/test/augenlinik/leistungsspektrum/81-grauer-star-katarakt.html>

and resize your browser to 1024 x 768

than click in the first paragraphe

The menu is over the popup. I want edit the menu, otherwise jtabs are overlying the menu...

Create CSS template in 'CSS Templates' section on the component backend with the following code:

```
body #fancy_biglframe,
body #fancy_freelframe {
  z-index: 1098;
}
```

```
body #div.fancy_bg {
  z-index: 1099;
}
```

```
body div#fancy_overlay,
body div#fancy_outer {
  z-index: 1100;
}
```

```
body img#fancy_img {
  z-index: 1102;
}
```

```
body div#fancy_content {  
  z-index: 1106;  
}
```

```
body div#fancy_loading,  
body div#fancy_close,  
body div#fancy_title,  
body a#fancy_left,  
body a#fancy_right {  
  z-index: 1110;  
}
```
