
Space on top of Slideshow

Posted by Smitan - 2011/01/18 12:19

Hi, on my site there is a empty space on top of the slideshow.
My customer wants the pages to resemble the frontpage.
For some reason I do not succeed in getting this done.

The sides (white-bleuishlines) are 450px and the height of the slideshow window is 433.
The name of the module is ARI Image Slide Show Midtnatsbowling
The name of the menu is Midtnatsbowling

I will send you login info by PM.

Hope you can explain that to me. :)
Greetings, Hans

Hello,

This is a problem with HTML layout of your site template. It contains the following code:

and

Images which contains table cells have more height than slider because empty space is shown. Fix this problem or provide correct credentials that we can help you (provided credentials doesn't work).

Regards,
ARI Soft

Thanks a lot again. How do I send you mail/PM?
I had no problems loggin in with the user/pw that I have sent to you.
I'll keep the user/PW open as long as needed: Support/AriSupport
