
Image slide show with ari data table

Posted by krentzis - 2011/04/04 09:14

Hello,

I have in content 2 ari slide shows and 2 ari datatables.

when I load the page i am getting this error

Fatal error: Call to undefined method AriUtils::isremoteresource() in
/home/generalg/public_html/new/modules/mod_aridatatables/includes/kernel/DataTables/Models/class.DataTablesDataC
svModel.php on line 42

if I remove the

{loadposition k-pshto}
located at the first line everything displays fine.

any clues?

thanks

Kostas

Hello,

Download and upgrade slideshow module. It should help.

sorry

Actually it is the image slider I am using and NOT the image slide show as mentioned in the title

Doesn't matter, download "ARI Image Slider" module and upgrade it please.

hello,

I am having the same problem

Fatal error: Call to undefined method AriUtils::isremoteressource() in
/home/generalg/public_html/demo/modules/mod_aridataTables/includes/kernel/DataTables/Models/class.DataTablesData
CsvModel.php on line 42

when I use Ari Data Tables and Ari Pretty photo together

I have the latest verion on both modules and plugins

can you please advice ?

thanks

Hello,

Could you provide temporary access to your J! backend by email and a link to a page where we can see the problem?
The latest version of "ARI Data Tables", "ARI Pretty Photo" and "ARI Image SlideShow" should work fine together.

Regards,
ARI Soft

Try now please.

PS: "ARI Pretty Photo" v. 1.5.21 is installed on your site, but the latest version is 1.6.2 so the error appeared.

Regards,
ARI Soft

it is working now thanks.

sorry for the trouble...I thought I downloaded the latest version but it seems it messed up with older version in my hard
drive.
