## Loading transition effect

Posted by line49 - 2011/05/16 20:01

---

Hi,

Is there any way to change the beginning transition effect for the slideshow, when the page is loaded. The customer doesn't want the blinds effect when the slideshow first loads. I don't see any parameters to control this.

Joomla 1.5.23

ARI Slideshow 1.2.10

Thank you.

Hello,

The latest version of "ARI Image SlideShow" module is 1.3.1. Download it in "Member Area" and upgrade it on your site please.

Hi,

Actually I do have 1.3.1 installed. The xml file in the module was not updated to reflect the new version number, it still has 1.2.10 in it, which is why I thought I had 1.2.10. But I did download and install the 1.3.1 package.

So, how do you change the beginning loading effects on the slideshow?

Thank you.

Hello,

Sorry, but could you explain your problem in more details? Blind effect is used for slideshow, but you don't want to use it for the first slide or you mean something another? The module can show loading pane while image are loaded. For this set "Loading pane -> Enabled" parameter to "Yes".
