1600px thumbnails are loading instead of 320px
Posted by jeffbetts - 2011/05/26 04:34

_____

The last two picasa galleries I've added are loading the 1600px image size from Picasaweb gallery thumbnail. My module is only allowing the left 300px to be shown, but the height is pushing the rest of my right-hand modules down and only part of the photo is visible since it's soo large.

Here's an example of one not working...http://ginnyhowelltours.com/specialty-tours/christmas-in-charleston.html You can take a look at almost any other page and see them working correctly.

Any ideas why this and one other are loading the large image?

@JeffBetts

_____

Hello,

Sorry, but provided page doesn't contain "ARI Image SlideShow" extension. It only contains "ARI Orbit Slider".

Regards,
ARI Soft
