Images in several directories

Posted by david.guillemet - 2011/12/14 12:06

_____

Hi,
Using Ari Image Slideshow, I would like to display images from several directories.
Then I entered all my source directories in the "Directories" list box of the module parameters, each one on a new line...
But it seems only thumbnails of the last one are generated, and all other directories seems to be ignored...
Did I make something wrong?
Thanks a lot in advance,
David

_____

Hello,

Could you provide a link to a page where we can see a problem and temporary access to your J! backend by email so we can investigate an issue?

Regards,
ARI Soft
