Error JFolder the path is not a folder

I downloaded and installed Ari Image SlideShow on my website, but I cannot upload the pictures. I wrote images/slide as the path of the images and I get an error that says something like 'the path is not a folder'. Maybe I placed the images in the wrong folder. Can you explain to me where I have to place them?
Thank you very much

Hello,

Could you provide a link to a page where we can see slider?

Regards,
ARI Soft
