
Cannot view images from Flickr

Posted by tasos26t - 2012/05/04 18:33

I have installed module and enabled plugins.

I see the structure of the module for slideshow but I can't see any images from the set or user (whatever I try).

Can you please help as this is very urgent? http://www.ari-soft.com/images/fbfiles/files/ari_flickr_settings.doc

Hello,

It is necessary to specify Flickr API key in "Flickr -> Flickr API key" parameter. More details about it can be found in "Description" field on module settings page.

Regards,
ARI Soft
