Ari Image Slider is covering submenus

Posted by adyzu_blaze - 2013/01/27 19:52

_____

Hello to everybody! I absolutely love your slider but for the last couple of hours i've been going crazy. The slider keeps going on top of the submenus every time the slide changes. Could you please take a look and tell me what i'm doing wrong? I've seen many topics in which you advise to add some custom css code. And if this is the solution where should i put it? In the module custom css? Or in the template custom css? Thanks in advance!

The website can be found here

_____

Hello,

This problem with site template styles. Add the following CSS rule:

```
#rt-top-surround
{
 z-index: 1000;
}
```

Regards,
ARI Soft
