
new slide show in content box

Posted by pixelschupser - 2013/12/20 09:57

Hello Ari Support

I want to do a slide show in a content box of joomla. in a seperat window all functions are clear and running.
But if I want to do this in a content box this means on the left side is the slideshow and on the middle and right side there is a textfield. But this did not function. I have the slide before the text field or after the textfield.
What can I do to fix this problem ?

At the moment I am working on my server at home, but if you want to have a connection to the original side, i can give you an account to the side. Then I must do a copy of the homeside to my official side.
But at the moment I want to work on my homeside.

Hello,

We suppose this is a problem with site template styles. Could you provide a link to a page where we can see the problem and image where we can see what do you want to achieve? If this information is private, you can send it by email.

Regards,
ARI Soft
