
Slider slow and old ini information still appearin

Posted by ColDog - 2014/08/14 18:31

Hi, hope someone can help.

My slider appears to reload every time it completes a full sequence?

Also, I have made a new ini file, but the slider is still showing the old info even though I have renamed it?

Here's a link: <http://universalwaterlife.com/>

Thanks.

Hello,

Send screenshot(s) of module settings page by email.

Regards,

ARI Soft
