Links are not working
Posted by marina181 - 2015/09/29 11:29

_____

Hello,

I created folder images/sliders. Put there 1 image: 1.jpg
In the ariimageslider.ini wrote:

1.jpg="This is foto1"

1.jpg="www.mysite.com/catalog/cake-tools"

1.jpg="foto1"
and..nothing. It seems that image doesn't "see" this ini file, because when I click on the image from slideshow it go to
http://www.mysite.com/images/sliders/1.jpg and not to www.mysite.com/catalog/cake-tools. Also description and alt are
not shown.
Can somebody help me to resolve it?

_____

Hello,

INI file should be located in folder with images. If it doesn't help, send a link to a page where the problem occurs so we
can investigate it.

Regards,
ARI Soft

_____

Hello!

Suddenly links are not working.

_____

Hello,

INI file is formatted incorrectly. Use " instead of " in value for 1.jpg in section.

Regards,
ARI Soft
