
PPTX Slideshow distorted

Posted by ferdievw - 2016/01/28 10:26

I used aridoc to upload a slideshow in and article in Joomla 3.4.
The slides are distorted. <http://www.genza.org.za/index.php/en/compendium/articles-of-general-interest>.
Please advise what I should do to rectify this issue. Ferdie

Hello,

The page doesn't contain "ARI Docs Viewer" extension.

Regards,
ARI Soft

Apologies, here is the aridoc version
and one implemented with microsoft and cloud storage:

We would prefer to use the aridoc version if we could get it to display the powerpoint presentation correctly.

<http://www.genza.org.za/index.php/en/compendium/articles-of-general-interest>

Please advise, Ferdie

The document is shown using Google Docs service and it doesn't provide any API to change how to handle documents.
