## Conflict Ari Image Slider and Ari Doc Viewer

Posted by VitoPalumbo - 2016/02/05 10:33

---

Ari Image Slider shows a black area and the sign as if something would load. When the pages don't contain any Ari Doc Viewer file embedded, the sliding images work correctly.

How to solve this conflict?

Hello,

Disable loading of jQuery in "ARI Docs Viewer" plugin settings.

Regards,  
ARI Soft
