
Image Slider Not Show in home page after upgrade

Posted by RAMONG - 2016/11/05 18:59

Hello,

After upgrading Joomla to 3.6.4 version ARI IMAGEN SLIDER dont show images in anyone of the pages (each page in my site has a image slider).

After installing Easy JQuery, as i read in the forum, the problem was solved but persist in HomePage.

The site's URL is: <http://www.mondaytranslations.com>

Any idea?

Thanks a lot!!

Ramon

Hello,

Home page doesn't contain a slider, this problem with site template or configuration of settings in "Menu assignment" parameters section on module settings page.

Regards,
ARI Soft
