
Flickr photaset shows black area only, no photos

Posted by mattias.vermeulen@simplys - 2016/12/05 12:46

Hi,

I'm trying to set up an ARI Image SlideShow module for a Flickr Photoset, but all I get is a black area where the slideshow should be.

The Flickr API key - secret - token setup is working fine, since I'm using it with a different Joomla extension in the same website as well.

I just selected 'Photoset' as the source and entered the photoset ID (verified to be correct).
It seems the module simply does not load the photos.

What could be wrong ?

Best regards,
Mattias

Hello,

Could you provide a link to a page where the problem occurs and a temporary access to your J! backend by email so we can investigate the problem?

Regards,
ARI Soft
