
Menu Selection Not Appearing

Posted by edwardcopping - 2017/01/12 17:35

I have Ari Image Slide 2.2.0 in Joomla 3.6.5 and when I go into the module it does not show the Menu Selection. It did when I created it, but then I have added new menu items but there is no way of selecting them to display the slide show. Any idea what might be causing this? I have other Joomla sites where it works fine.

Hello,

Could you provide a temporary access to your J! backend by email so we can investigate the problem?

Regards,
ARI Soft
