
Multiple Slide Shows?

Posted by TimScudder - 2010/07/30 13:07

Is there a way to have different slide shows in multiple articles? For example, to have a slide show based on contents of Folder1 in a Front page article and to have another slide show based on the contents of Folder2 in a news article?

Hello,

Sure, create new instance of 'ARI Image SlideShow' module for this purpose. Open 'Extensions -> Module Manager' page on the backend, click 'New' button, choose 'ARI Image SlideShow' and click 'Next' button. If you want to create copy of existing module, open 'Extensions -> Module Manager' page, select 'ARI Image SlideShow' module in modules data grid and click 'Copy' button.

Regards,
ARI Soft
