
Image Slideshow -csv file

Posted by marietek - 2017/06/09 17:02

Hi
I just bought your "Image slide\$how" today.
It is quite good, except I don't know where to put the csv file with the description?
I put my images in images/galerie-femmes. Is it there ?

Thanks
marie

Hello,

Add CSV file to folder with images. If the slider is used to show images from / images/galerie-femmes folder then add CSV file to this folder. One note, each sub-folder should have own CSV file.

Regards,
ARI Soft

I try a lot of registration for the csv file with no any success.
I put one in attachment file.
If I can not succeed in that, can you tell me which ARI product is possible to take for the same effect, but easier ?
Have a nice day
marietek

Hello,

The first row should contain column names:

"File","Title","Link"

For example:

"File","Title","Link"
"11-Dentelles.jpg","Galante 50x30", ""
"13-Dame--la-voilette-Pastel-60x80.jpg","Sous la voilette 80x60", ""

Regards,
ARI Soft
