ARI image works only on some pages!

Hi, The ARI was working on my website very well. But it suddenly stopped working in all menus except one?! (http://viengsoc.ca/index.php/collaboration)

I can see that the module is still there and I can click on that, however, the pictures don't show up!!

Any idea how to solve this?

Thanks
Babak

Hello,

We don't see the module on the page. Could you describe in more details where the problem occurs.

Regards,
ARI Soft
