## Imageslider no slider when reload the site

Posted by artolino - 2019/09/07 08:48

---

Hello,

I'm using image slider with Joomla (as a starter :o) ) Vers.: 2.2.5.

The first time I open the website slider is working correct.

If I change to another site and go back to "home" slider is no more working????

The Site: [www.artolino.ch](http://www.artolino.ch)

Please can you help me?

Thank you very much

Hello,

Javascript code for initialization the slider is absent on the page after reload. It looks like a problem with a 3rd party plugin or site template. Usually it occurs when an incorrect code is used by plugins/site template to remove some JS libraries/code.

Regards,  
ARI Soft
