The links don\'t work
Posted by tratru - 2020/09/16 12:10
_____

Hi everyone
I am using the ARI Image SlideShow component version 2.2.5
on Joomla ver 3.9.21
my idea was to have more images that turned out and each image a different link
to do this I have compiled the INI file but despite the considerable tests I cannot make it work

Img-1.jpg = "https://www.Mysite.com/link1"
Img-2.jpg = "https://www.Mysite.com/link2"

I can't understand what he has mistaken
Thank you

Hello,

Could you provide a link to a page where the problem occurs and a temporary access to your J! backend by email?

Regards,
ARI Soft

_____

solved thanks

I had left the INI file in the module directory

_____

INI file should be located directly in folder with images, not in a parent folder.

Regards,
ARI Soft
