## image slideshow

Posted by pixelschupser - 2020/11/04 09:25

_____

Good morning support
I had the follwoing error after install image slide show  on a new joomla system. """"""Where  is ARI Image SlideShow module id. You can find module id if open 'Extensions->Module Manager' page in modules grid in ID column or on module settings page in ID field. """"""""
But all sides are in a white build and I show anything, tge only side which is function properly is the installation window in the Extension Path all other sides are white

How can I fix this problem ?

kind regards
HansjÃ¶rg Lauble

_____

Good morning support
Here comes the error messages joomla give me in error.log

Fatal error: Cannot make static method Joomla\CMS\Helper\ModuleHelper::getModuleById() non static in class AriModuleHelper in /www/htdocs/w0134398/h-
la.de/plugins/content/arislideshow/arislideshow/kernel/Module/j16/class.ModuleHelper.php on line 8

Pleas Help me

greetings from germany

_____

good morning support

Both ends with a green image and successfull.

mod_arislideshow.zip and plg_content_arislideshow.zip

I was in the plg_content_arislideshow and acticate it. And now there goes nothing all windows are white

I was looking under google and thsi shows me the window where I should download from my profile the neweset version of the program,
but on 3 other sides the slideshow function perfect since years.

kind regards

_____

Hello,

Upgrade the module and the plugin to latest version. It is available in "Member Area" on our site.

You can also login by FTP to your server, open
/plugins/content/arislideshow/arislideshow/kernel/Module/j16/class.ModuleHelper.php file and replace the code:

public function &getModuleById($moduleId)

with the following one:

public static function &getModuleById($moduleId)
[/code[

Regards,
ARI Soft
