## Titles to images

Posted by Smitan - 2011/01/08 09:41

---

Hi, for some reason I can not get the titles to function.  
My file is attached. Changed the name to txt

I saved the csv-file, both in the image-folder and in the module-folder.  
The name of the file I wrote into the Description File field.

So, what am I doing wrong here?

Hello,

The first row with column names is missing. Find correct CSV file in attach please.

PS: You can delete CSV file from module folder because the module uses it only from image folders.

Thanks a lot for your fast and good reply.  
It functions now. Thought the 'title-row' was only as an example. :)

Sorry, I have the same problem, I can not display the titles. I have set in the Description parameters File "Titulos.ini", this file is located in the folder where the images are  
The contents of the file is:

```
"File","Title","Link"  
"001.jpg","PP-PAU II6 Carabanchel - Madrid - 2005",""  
"003.jpg","EDAR Barranco Seco, Las Palmas de Gran Canaria (Las Palmas) 2008",""
```

Thank you very much

Hello,

Could you provide INI file and screenshot with module settings or temporary access to your Joomla! backend by email that we can investigate this problem?

You use "ARI Image Slider", not "ARI Image SlideShow" extension. "ARI Image Slider" is used INI file for set titles and links for images. Find sample INI file in attach please.
