
Multiple photo sets rather than all under one img

Posted by matttrbailey - 2013/12/29 00:22

Hi,

I have just purchased ARI Photo Gallery. It's up and running fine, but I want to use more than one photo set from flickr.

I have added the three photo set numbers into the config with a ;. However there is only one image with all the images from all the sets added behind.

I would like the front image for each set to display in a line, then click on each image to show the images from those sets.

URL: www.digital-images.co.uk - click Gallery - The site is still under construction.

=====

Hello,

Sorry, but the extension doesn't work in this way. It requires to create several module instances (or you separate plugin code) for each photoset.

Regards,
ARI Soft
