Popup do not work from Module
Posted by liubov - 2016/04/12 09:10

_____

Hi,

I have a brand new website in Joomla 3.5.1 and have installed Ari Popup Images Module.
The Ari Module displays Images (from folder) but the popup does not work as it should do.

Ari Module Name is 'Chiots Disponibles' (Available Puppies) in the Right Position.

Connect to my website with aripopup/aripopup on www.liubov.net to troubleshoot this issue.

I checked stylesheet, includes/js, ... all seems ok, so i don't see.

I use this module for long that was ok with my joomla1.5 old site here :liubov.net/husky-oldsite

Last thing, Same problem on my dev plateform with only Joomla Basic Template (no RocketT Gantry)

_____

Hello,

Download "ARI Image Popup" v. 1.4.4 in "Member Area" on our site and upgrade the module. It should help to resolve the problem.

Regards,
ARI Soft

_____

I really like when supports are so efficient :)

Thanks a lot ARI.
