
ARI Image Popup not functioning

Posted by ncllc - 2010/12/10 03:43

I have followed the instruction in the module and plugin for the content area. For whatever reason, it is not showing on my site. Please advise.

Thanks.

Ok, I managed to fix the picture problem. How do I upload the description and title? I changed the csv sheet, upload to the same directory, upload it to root directory. None of which work? Where am I suppose to save it to?

Thanks.

Hello,

CSV file with description should be located in folder with images. Could you send your CSV file and say link to page where we can see the problem that we can investigate this problem?

Regards,
ARI Soft

Thank you. This is helpful. I managed to fix the problem using your response.

How can I adjust the pirobox where instead of showing "title" from the csv, it shows another variables in the csv?

Can you please point me to the right file to change?

Thanks.

If you use 'Simple gallery' layout type, we can extend functionality of the extension and add possibility to specify column name which will use as caption under thumbnail. Is it suitable for you?

Regards,
ARI Soft

We have updated "ARI Image Popup" module and "ARI Image Popup Anywhere" plugin and upgrade them on your site. It also can be downloaded from "Member Area" on our site. Now the module shows title and captions in way which you described.

Thank you so much, what you did is awesome! A couple of suggestion if it's ok.

1. Rather than have the caption be "centered", can it be "justified"? So the texts would line up?
2. Is it possible to make the texts fill up the width of the pyrobox?
3. I tried to put some html codes in the csv file, for example `<code> or to change the font. The is coming through the "topic" but the is not coming through the title, do you happen to know why?`

Thank you. I think after these changes, this module will kick even more butt!

You are welcome. Regarding your questions:

- 1 and 2. Do you mean description and topic data items in lightbox? If yes, you can use the following title template:

{ \$Title}
{ \$Topic}
{ \$Description}

3. Currently "Title" and "Topic" are bold in lightbox. Could you provide link where we can see this problem?

Regards,
ARI Soft

Thank you so much for your guidance.

I was able to bold the texts in the csv file, but when I do it under title template inside the module, it doesn't bold the texts.

For example, I did { \$Topic} but it is not reflecting on the page.

Thanks.

PS Thanks for the fantastic job you guys have done! I'll be sure to give you 5 star on the Joomla extension section.
Thanks!

If you have any problem with formatting, provide link to page where we can see it and we'll investigate this problem. If it is private information, you can sent it by email.

PS: Thank you for the review. We are glad to see happy customers :)

Regards,
ARI Soft
