## ARI Sexy Lightbox for joomla 1.6

Posted by franklt69 - 2011/02/23 19:40

---

I just bought ARI Sexy Lightbox for joomla 1.6 to save time, and i following the instructions in the readme, my template was working ok when i set in Plug-in Manager: System - ARI Sexy Lightbox = Enable= Checked, I get this error in Firefox using firebug:

```
jQuery is not defined
eval(function(p,a,c,k,e,r){e=function(...os|525|easeInBounce'.split('|'),0,{}))
jquery.easing.js (line 13)
jQuery is not defined
eval(function(p,a,c,k,e,r){e=function(...cation|for|unescape'.split('|'),0,{}))
jquery....min.js (line 12)
jQuery is not defined
```

and in the Firebug's tab Net I can watch [http://www.xxx.com/modules/mod\\_arisexylightbox/includes/js/jquery.easing.js](http://www.xxx.com/modules/mod_arisexylightbox/includes/js/jquery.easing.js)  
[http://www.xxx.com/modules/mod\\_arisexylightbox/includes/js/jquery.sexylightbox.min.js](http://www.xxx.com/modules/mod_arisexylightbox/includes/js/jquery.sexylightbox.min.js)

any help please

reagrds  
Frank

Note if I set Plug-in Manager: System - ARI Sexy Lightbox = Enable= UnChecked, the error not appear but i guest i can't use it

Hello,

Open plugin settings page, set "Include jQuery" parameter to "Yes" and save settings.

The Plug-in Manager: System - ARI Sexy Lightbox  
have Include jQuery = yes for default

??

Ok i set include = yes and save (for default it was in yes) but i save and not appear the error, now to begin to play with the component

i added it in a article

```
{arisexylightbox moduleId="98"}{/arisexylightbox} {arisexylightbox activeType="icontent" width="300" height="250" link="Click me" title="Hidden text"}Inline content which you want to show in sexy lightbox goes here.{/arisexylightbox}
```

and i get this error

ARI Sexy Lightbox: error occurs.

```
jQuery is not defined
eval(function(p,a,c,k,e,r){e=function(...s|525|easeInBounce'.split('|'),0,{}))
js4c17e.js (line 82)
jQuery is not defined
(window || jQuery)(docume...box\includes\js\sexyimages")); });
```

regards  
Frank

---

Do you use any extension for optimizing javascript and CSS files loading? If yes, it seems it can't handle external javascript files correctly.

where i can see in my template that i was using any extension for optimizing javascript and CSS files loading?

in the same article i added

YouTube video

and work ok

Could you provide link to page where we can see this problem? If it is private, you can send it by email. If your site is on your local machine, could you send HTML source of the page (press "Ctrl + U" in FireFox browser)?
