external page opens in new window
Posted by DanielKonstanz - 2011/03/22 03:50

_____

Sorry for the stupid question, but if i am using the code to iframe an external page, this page will open in a new window.

I'm using the following code directly in my article:

 Show Quiz

any ideas what happened ?

Thank you, Chris

_____

Hello thanks in advance !

The page address is: http://phayaohospital.com/education
and the link "Show Quiz" -> this should open in a lightbox but instead opens a new page.

_____

Hello,

Necessary javascript files are not loaded. If it is possible to provide temporary access to your Joomla! backend by email, we will investigate this problem in more details.

Regards,
ARI Soft
