
Pop-up Window displays scroll bars - CSS Solution?

Posted by redbarn - 2011/04/02 18:54

Hi I just purchased your fabulous "Sexy Lightbox" extension.
I am using the external link plug-in to view a Vimeo video.

Everything seems to be working great, except for one thing.
The pop-up lightbox displays both horizontal and vertical scrollbars.

I know it's a css rule in my custom template CSS file that seems to be overriding the "sexylightbox.css" file. Changing to any of the three default joomla templates removes the scrollbars.

Is there a rule within the "sexylightbox.css" file where I can add a rule like "overflow:hidden" or something else, to remove the scroll bars from the pop-up lightbox window?

Much thanks in advance,
Rick http://www.ari-soft.com/images/fbfiles/images/Home_Page.png

Hello,

Provide link to page where we can see the problem. It seems this is a problem with site template styles.

Regards,
ARI Soft

Wow. Thanks for the quick reply.

Yes, you are correct - something in the site template CSS file is forcing the scroll bars.

Here is the Home Page link:
<http://174.36.179.67/~polkcdco/>

In the left panel you will see "Click here to view our promotional video".
This will open the Lightbox.

Here is the CSS link:
<http://174.36.179.67/~polkcdco/templates/pcdc/css/style.css>

Thanks for looking at this.

Try to add the next CSS rule to site template CSS file:

```
DIV#SLB-Image
{
  overflow: hidden !important;
```

}

Perfect!
That did it. Thanks very much.
I'm not sure I would have ever been able to isolate which rule to add.
You guys rock.

This extension is very cool.

Thanks again,
Rick
