
sexy lightbox lite not showing content

Posted by ewoodruff - 2011/11/08 18:59

Hello,
I have installed sexy-lightbox lite and enabled the plugin. I created an article "lightbox test" and pasted the HTML code to display the google link using the JCE editor in HTML mode. I call up the "lightbox test" article with a menu. The article appears, I click on google and the lightbox appears, but it is empty. Can't figure out what I am missing!

Any help appreciated.

Hello,

Provide a link to a page where we can see the problem.

Regards,
ARI Soft
